MedPulseOS

Bridging Communities. Empowering Health.

A Digital Platform for the Family Adoption Programme (FAP)

MedPulseOS is a comprehensive digital platform designed to streamline and strengthen the Family Adoption Programme in medical colleges.

FOR STUDENTS

Organise assigned families, complete field visits digitally, record structured health data and track follow-ups.

FOR PATIENTS & FAMILIES

Support continuity of care, referrals, health awareness and easier access to appropriate healthcare services.

FOR COLLEGES

Monitor academic activity, FAP progress, field performance and programme outcomes through dashboards.

Why MedPulseOS?

One connected workflow from student assignment to family follow-up.

- Digital family records and structured field-visit data
- Smart FAP management with role-based access
- Academic monitoring and actionable programme analytics
- Streamlined hospital referrals and follow-up tracking

Ready to modernise your FAP?

Bring students, faculty, families and healthcare services into one secure workflow.

LET'S CONNECT

Smart FAP Management

A structured digital backbone for the Family Adoption Programme — from assignment and field visits to referrals, monitoring and reporting.

How It Works

1. **Assigned Families**
2. **Field Visits**
3. **Structured Data**
4. **Hospital Referrals**
5. **Academic Monitoring**

What the platform manages

Family & Student Assignment

Allocate and manage adopted families with clear ownership and programme visibility.

Digital Field Visits

Capture household, demographic and health-related information during community visits.

Academic Monitoring

Track student activity, visit completion, data quality, follow-ups and FAP participation.

Referral Management

Move families needing further care into a streamlined hospital referral workflow.

Doctor Availability

Help families and programme teams understand specialist availability and consultation pathways.

Reports & Analytics

Turn programme data into dashboards, trends, follow-up lists and institutional reports.

Academic Monitoring
Faculty and administrators get a clear view of progress without turning FAP into a spreadsheet-management exercise.

Benefits, Security & Pricing

Designed to create measurable value for students, patients, faculty and medical institutions.

Benefits to Students & Patients

STUDENTS

- Less paperwork and cleaner digital documentation.
- Easy access to assigned families and follow-up history.
- Structured field-visit workflow.
- Better visibility of pending tasks and referrals.
- Academic participation that can be monitored objectively.

PATIENTS & FAMILIES

- Continuous follow-up and better continuity of care.
- Digital family health records for organised information.
- Timely referrals when further investigation or treatment is needed.
- Improved awareness of preventive care and health practices.
- Clearer access to doctor and specialist information.

Secure & Confidential

- Role-based access.
- Secure, encrypted database.
- Username/password protected login.
- Privacy & security aligned design.
- Patient and family information kept confidential.

Institutional Pricing

Starting from

₹80,000

Flexible • Scalable • Tailored

Final pricing varies by institution size, users, modules, deployment and support.

Our Goal

To digitally strengthen the Family Adoption Programme, improve community health, and create a seamless bridge between medical students, adopted families, medical colleges and the healthcare system.
